

- Globin-like
- Ribonuclease H-like motif
- beta-Grasp (ubiquitin-like)
- Periplasmic binding protein-like II
- Knottins (small inhibitors, toxins, lectins)
- P-loop containing nucleoside triphosphate hydrolases
- DNA/RNA-binding 3-helical bundle
- alpha/beta-Hydrolases
- Ferredoxin-like
- NAD(P)-binding Rossmann-fold domains
- OB-fold
- TIM beta/alpha-barrel
- Thioredoxin fold
- Concanavalin A-like lectins/glucanases
- PLP-dependent transferase-like
- Immunoglobulin-like beta-sandwich
- Protein kinase-like (PK-like)
- SH3-like barrel
- Flavodoxin-like
- alpha-alpha superhelix
